

## *We Have A Soul*

We all have a soul, most of us don't think much about our soul, and some do not even believe we have a soul within us. When someone is doing wrong, their soul tells them how wrong it is but most of us won't listen to it.

There is a soul within us all and we should listen to it because it is from God and that he is always with us and guiding us to do the right thing. Angels are near us as well and will help you when you call on them, if you live your life as a good person.

When God created us, he gave every one of us a soul, because God wanted us all after our life was over to come to him to a heavenly place, we call heaven; where we all will live with God through eternity.

We live in a world where evil is all around us and outweighs the good and some may blame God for it, but we are comforted because He is looking over us and wanting us all to live a happy life. Freewill is the cause of the bad, not God. Believe in him, that's all he asks of you.

Remember this the next time you're thinking of doing something wrong, that God owns your soul within you and when your time comes to an end on this Earth, you can do nothing with your life, but submit to Him, who owns your soul.
